

Découvrir et évaluer les acteurs de l'innovation.

→ Motherbase SaaS permet de sélectionner et d'évaluer les acteurs de l'innovation quel que soit le secteur et les critères retenus.

Sourcing d'acteurs innovants

1

Accès temps réel à une base de 175.000 acteurs

Partout dans le monde, tous secteurs toutes technologies, dont 18.000 startups en France

2

Sélection multi-critères

Par géographie, secteur, technologie, nombre d'employés, niveau de maturité, mais aussi par recherche en texte libre, ou en fonction des relations existantes avec les grands donneurs d'ordre, ...

3

Evaluation et suivi des listes de résultat

Informations mises à jour en continu, définition d'alertes selon vos propres critères, analyse automatisée de dynamique par acteur, création de « playlists » selon vos thématiques, ...

The screenshot shows a search interface with a top bar containing a search icon and the word "Search". Below this, there are several filter sections. The first section is "Text:" with a text input field and checkboxes for "Also in original language" and "Full text search" (which is highlighted in red and labeled "ALPHA"). To the right of this is an "Operator:" section with radio buttons for "And" and "Or". Below the "Text:" section is a small text block explaining search syntax: "The symbol '-' in front of terms excludes them from the search. You can search a full sequence of terms by surrounding them with double-quotes (''). By default, search are in both name and description, but you can explicitly search them separately with 'name:' and/or 'desc:' in front of terms. Full text search is english only and support logical operators." Below this is a "Less Filters" button. The main section is titled "Additional Filters" and contains several filter groups. "By Entity:" has a dropdown menu with "Startup" selected. "By Activity:" has a dropdown menu with "deeptech" selected. "By Technology:" has a dropdown menu with "A.I." selected. "By Tag:" has a text input field. "By Corporate:" has a text input field. "By Corporate's Type of Interaction:" has radio buttons for "All", "Capitalistic", "Partnership", "Event", and "Others", with "All" selected. "By Dynamics:" has radio buttons for "A+", "A", "B", and "C", with "A+" selected. "By Country:" has a dropdown menu with "France" selected. "By Area:" and "By Subarea:" have text input fields. "By Number of Employees:" has a range slider from 0 to 1K, with "Exclude N/A" checked. "By Total Fundraising:" has a range slider from \$0 to \$1B, with "Exclude N/A" checked. At the bottom, there are "Start date:" and "End date:" fields with calendar icons, and an "Is Visible:" section with radio buttons for "N/A", "Yes", and "No". At the very bottom are "Clear" and "Search" buttons.
