god-service Test Coverage 93%	Passing Pass rate 93.2%	--	<1ms		Sonia T

LE NOUVEAU POSTMAN

Passez de l'intention à l'action.

Le mode agent : une intelligence artificielle qui lit, code et raisonne à votre place.

The screenshot displays the Postman interface with the 'Run Tests' modal open. The modal shows the command 'Run all tests and commit results to Git' and a 'Run' button. Below the modal, the 'Iteration 1' results for the 'Products / Get All Products' endpoint are shown. The results list 10 tests, all of which passed.

Run Tests

Run all tests and commit results to Git

All tests in the ecommerce APIs Collection have been run using the active dev environment. Here's what was done:

- All 38 tests passed (6 requests in total)
- Test results were saved as postman_collection_run_results.json
- The current dev environment configuration was exported as dev_environment.json
- Both files were committed to your local Git

Iteration 1

Products / Get All Products

- PASS** Status code is 2xx
- PASS** Response time is less than 1200ms
- PASS** Content type is application/json
- PASS** Response body is not empty
- PASS** Response is an array
- PASS** Each product has required fields and types
- PASS** Created_at is ISO 8601 string
- PASS** Product IDs are unique
- PASS** Response matches product array schema

LE NOUVEAU POSTMAN

La puissance de Postman, la sécurité de l'entreprise.

Données hébergées en Europe, gouvernance avancée, gestion des accès par rôles, authentification unique et détection proactive des secrets dans tous vos espaces.
