

Security. Simplified.

Presenter's name

Presenter's Title

A futuristic, curved tunnel with glowing lines and a train in the distance.

Ours is a world of rapid transformation

Ours is a world of rapid transformation

You'll never have less data than you have today

348TB Amount of data managed
by the average enterprise

That data is used in more remote locations

75% Of workers will be
full- or part-time remote

And exposed between more remote applications

70% Of workloads are
executed in the cloud

Open to attacks from a huge enemy

86% Of businesses admit to
being compromised

You're expected to manage a growing conga-line of products

76

Number of security tools
managed on average

With a rapidly dwindling workforce

3.5M

Security jobs are
currently open

Security doesn't need to be complex

- Embrace zero trust
- Manage policies in one place
- Push enforcement to the edge
- Make data uniform and fast everywhere — even from BYOD

Take a new approach with Forcepoint solutions

Unified. Modern. Reliable. Fast.

Forcepoint Secure SD-WAN/NGFW

Simplified zero-touch deployment, unified policies

Flexible all-in-one SD-WAN, NGFW, IPS, VPN, and more

Scalable single-click update of thousands of sites at once

Reliable unmatched clustering with zero-downtime updates

Fast high-speed inspection even in cloud / virtual platforms

Forcepoint ONE

Unified all-in-one console & policies for easy management

Modern secures data with Zero Trust delivered via a SASE architecture

Global available everywhere, 300+ PoPs for managed devices & agentless BYOD

Reliable 99.99% uptime since 2015

Fast eliminates choke points so apps run faster

Forcepoint Enterprise DLP

Simplified extensive policy libraries make setup far easier

Precise high accuracy dramatically lowers alert “noise”

Everywhere “one policy to rule them all” from endpoint through network into cloud

Automated risk-adaptive protection focuses enforcement without sacrificing user productivity

The Power of ONE

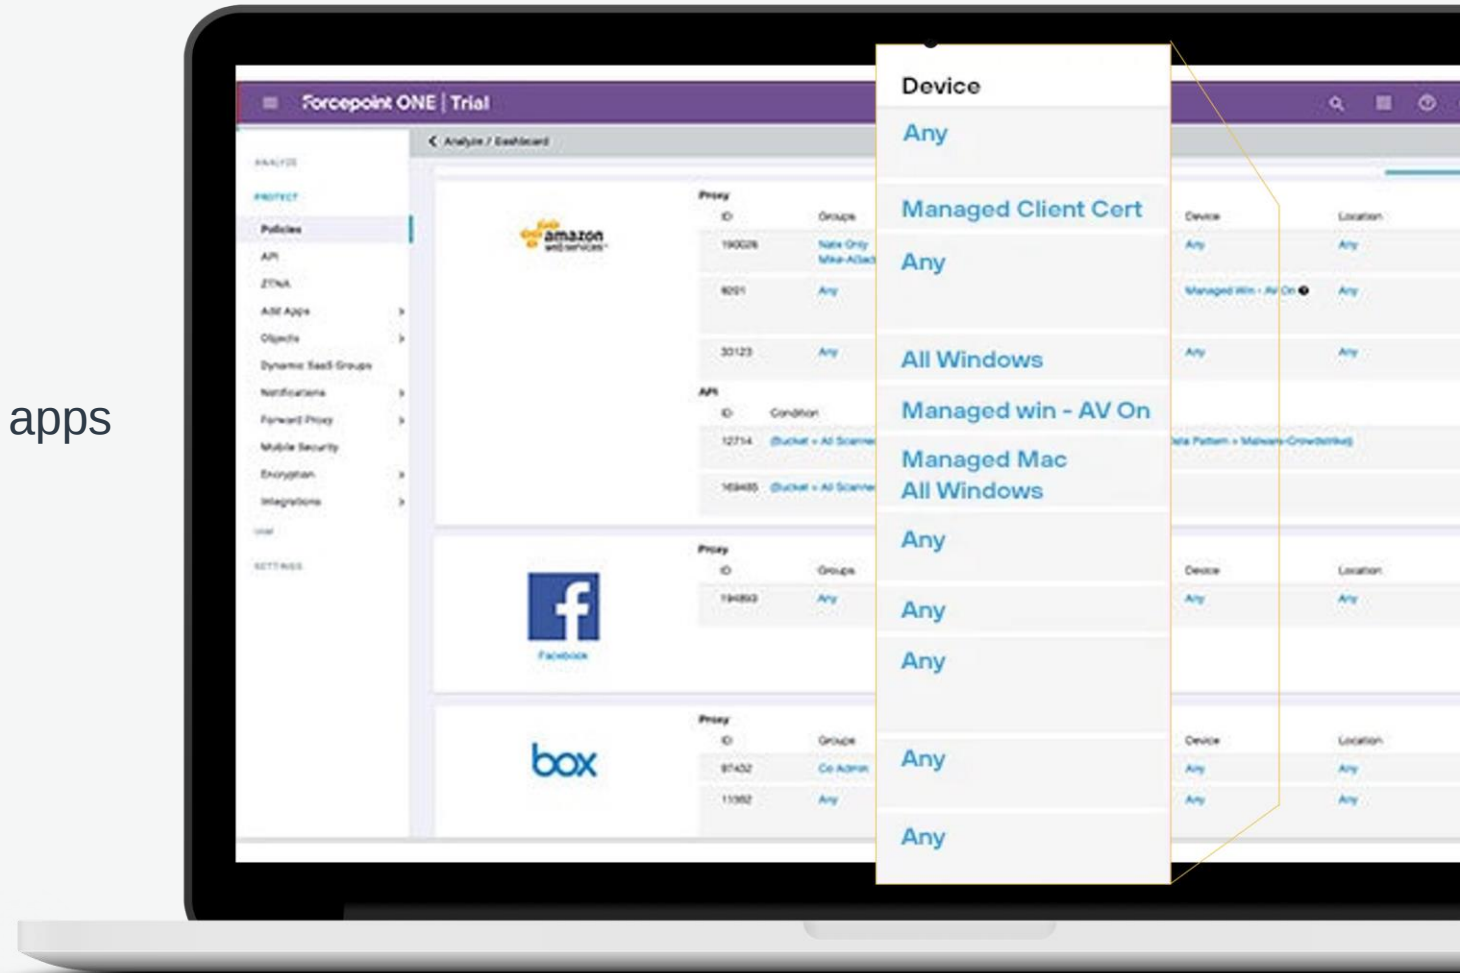

Forcepoint ONE

ONE cloud-native, Zero Trust platform

ONE set of policies for web, cloud, private apps

ONE unified way to secure data

ONE integrated cloud console

Accelerate business transformation

Increase productivity

Reduce risk

Lower costs

Streamline compliance
