

Applied Biosystems™

MicroAmp™ 96-Well Tray/Retainer Set

**Catalog number:** 403081**Related applications:** [PCR](#)

Description

Applied Biosystems® MicroAmp® Tray/Retainer Sets, available in a 96- or 24-well format, hold MicroAmp® Reaction Tubes without Caps for processing on the Veriti™ 96-Well Thermal Cycler, 96-Well GeneAmp® PCR System 9700, or the Applied Biosystems 2720 Thermal Cycler.

- Available in 96- or 24-well format, offering flexibility
- Designed for compatibility with MicroAmp® Reaction Tubes and MicroAmp® 8-Strip Reaction Tubes

Convenience and Performance

The MicroAmp® Tray/Retainer Sets allow you to organize your tubes while adding samples and mixing. This handy tool reduces spillage and tube mix-ups by securing and ordering your tubes on your lab bench. When the samples are ready, simply put the tray of tubes directly on the block of the GeneAmp Thermal Cycler. Not only does the tray eliminate the hassle of transferring the tubes but it also provides the thermal contact necessary for high-performance thermal cycling.

Note: See user's manual or package insert for limited label license, and trademark information. For Research Use Only. Not for use in diagnostics procedures.
