

Applied Biosystems™

MicroAmp™ 96-Well Tray

Catalog number: N8010541

Related applications: [PCR](#) | [Real Time PCR \(qPCR\)](#)

Description

The Applied Biosystems® MicroAmp® 96-Well Tray, specifically designed to snugly hold up to 96 MicroAmp® Reaction Tubes with Caps, is required for more efficient sample processing on Applied Biosystems® 96-well thermal cyclers.

- Engineered for efficient sample processing
- Designed specifically for MicroAmp® Reaction Tubes with Caps
- Manufactured to high specification, ensuring a quality product

Convenience and Performance

The MicroAmp® 96-Well Tray allows you to organize your tubes while adding sample and mix. This handy tray reduces spillage and tube mix-ups by securing and ordering your tubes on the lab bench. When the samples are ready, simply put the tray of tubes directly on the block of the thermal cycler. Not only does the tray eliminate the hassle of transferring the tubes, but it also provides the thermal contact necessary for thermal cycling.

Note:

See user's manual or package insert for limited label license and trademark information. For Research Use Only. Not for use in diagnostics procedures.
