material	PTFE/silicone septum (bonded with slit)
	blue polypropylene hole cap
	clear glass vial
feature	closure type blue polypropylene hole cap
	closure type screw top vial
packaging	pkg of 100 ea
O.D. × H × I.D.	12 mm × 32 mm × 6 mm
volume	0.3 mL
fitting	thread 9 mm

Description

General description

The QSertVial™ is the ultimate microsampling device. It contains a 300 µL glass insert that is fused to the vial to form one precise integral unit. The rim of the insert is positioned slightly above the top of the vial so the septum can make a secure seal with the closure, eliminating evaporation and cross contamination. The insert is centered into the vial, 2 mm from the bottom, allowing for consistent sample recovery and eliminating problems caused by variation in insert depth. It is compatible with the majority of autosamplers in the market. It is available in a variety of kit configurations.

- Evaporation and cross contamination between insert and vial is eliminated
- Higher sample recovery with either bottom loading or side loading needles (point style #2 and #5). Residual dead volume can be as low as 4 µL, depending on precision adjustment of the instrument.
- Consistent sample recovery from vial to vial because the insert is always at the same precise depth within the vial.
- Wide mouth opening has larger target area reducing the possibility of bent needles.
- Easy sample identification of white mat finish marking panel.
- Available in clear or amber glass.

Suitability
Autosampler compatibility:
Agilent
Agilent 1050/1090A
Agilent 1100/1200
Agilent 7673A, 7683
Agilent 5890/7985A/6850/6890
LEAP Technologies
CTC LC PAL, GC PAL
CombiPAL
HTC PAL/HTS PAL
Shimadzu LC Autosamplers
SIL-HTa/SIL-HTc
SIL-10ADvp
SIL-10A/SIL-10Ai/SIL-10AP
Varian
CP-9010
8000/8035/8100/8200
9100/9090/9095

Vista
Waters
Alliance 2690/2695
