Propriétés

Related Categories	Analytical/Chromatography, Caps for 22 mL Vials, Caps, Crimp Seals and Stoppers, Sampling Vials, Caps, and Septa, Sampling, Storage, and Serum Bottles, Plus...
material	F217/PTFE liner green melamine resin solid cap
size	20-400
feature	closure type screw thread, green melamine solid cap, PTFE liner temp. limit 49 °C
packaging	pkg of 100 ea
fitting	thread 20-400 montrer plus (9)

Description

General description
Green Thermoset Plastic Caps with F-217 PTFE Liners are known for providing the widest range of chemical compatibility and for being the most temperature tolerant of plastic closures. The color green easily identifies the PTFE liner system. F-217 foam-backed PTFE liners resist attack from virtually all chemicals at room temperature and provides odor and impact resilience for a tight seal with a low moisture transmission rate. F-217 has a low density foam core between two solid layers of LDPE (low density polyethylene). Some uses for these F-217/PTFE lined caps include analytical lab samples, high purity chemicals, strong acids solvents, environmental samples, pharmaceuticals, and diagnostic reagents.
