Informations générales	The Fluid Sampling Kit is a complete solution for field-based fluid collection and contamination analysis. The stainless steel sampler assembly plugs into a quick-release valve installed in the system line, which allows a measured quantity of liquid to pass through the monitor. A valved syringe serves as a pump to remove residual liquid from the monitor. Kit is compatible with our 37 mm contamination monitors and matched-weight monitors. For gravimetric analysis, accessory Matched-Weight Monitors eliminate filter pre-weighing before sampling. Features & Benefits: •Sturdy carrying case and stainless steel sampling assembly provide years of in-field service •Fluid Sampling Kit includes 12 Tenite® contamination monitors Applications: For sampling turbine fuels, water or other liquids through Millipore Contamination Analysis Monitors prior to gravimetric or colorimetric analysis.

Informations produit	
Dispositifs compatibles	• Fluid Sampling Kit

Applications	
Application	Accessories for filter holders for sample preparation.
