

DID YOU KNOW?

Tips are essential components of your pipetting system. By not using recommended tips, you put your experiment at risk.

Your protocols and experiments require more than just generic pipette tips. Accuracy and precision of your pipetting system is intimately linked to the performance delivered by the "pipette-tip couple".

PIPETMAN DIAMOND Tips guarantee that Gilson pipettes meet our specified tolerances and deliver consistent results over time.

Superior Accuracy and Precision guaranteed

Tips contribute up to 50% to the performance of your pipetting system (ISO 8655-2*). Loose tip fitting is a major cause of bad performance.

Specifically designed for the Gilson pipettes, the diameter of the tip-collar and tip-holder of the PIPETMAN DIAMOND Tips are calculated to fit perfectly, thus ensuring a perfect seal.

Prevention of Contamination

Often overlooked as a source of sample contamination, the pipette tip comes into direct contact with the sample and may contaminate the solution. PIPETMAN DIAMOND Tips are designed to meet the most stringent demands in various fields and applications such as PCR, molecular biology or cell technology.

- Manufactured and packaged in a clean production environment.
- 100% pure polypropylene ensures no contamination.
- High quality filter tips.

Take a step forward in meeting your quality requirements

STERILIZED TIPS

- Sterilized by gamma irradiation with SAL 10⁻⁶ guaranteed in accordance with ISO 11137.
- Free of detectable RNases, DNases, DNA, RNA, ATP and pyrogens.
- All packs wrapped in medical device quality plastic that provides a complete shield against contamination.
- Sterilization expiration date on each rack.

MEETING THE NORMATIVE ENVIRONMENT

- PIPETMAN DIAMOND Tips are designed so that Gilson pipettes meet the EN ISO 8655 requirements and ensure compliance with Good Laboratory Practices.
- PIPETMAN DIAMOND Tips are CE certified for the In Vitro Diagnostic (IVD) directive.

FULL TRACEABILITY

- Clear batch number identification on all packaging ensures full traceability from the mold to your laboratory bench.
- Quality certificates with detailed protocols and detection levels for each batch are downloadable from our website.
- All tip packaging are labelled with a two dimensional bar-code (2D datamatrix) containing the product reference, the lot number and the quantity for enhanced traceability.

EASY IDENTIFICATION = ERROR FREE MANIPULATION

- Color-coded packaging.

ENVIRONMENTAL POLICY

- All plastic parts and cardboard packaging are recyclable and identified as such.

PIPETMAN DIAMOND Tips assure optimal performance of your PIPETMAN pipette.

Same high quality tips in various packaging options to suit your needs

ECOPACK™ & EASYPACK™ BULK TIPS: AN ECONOMICAL SOLUTION

Bags are available in two formats:

- **ECOPACK** (10 bags of 1000 tips),
- **EASYPACK** (5 bags of 200 tips).

TOWERPACK™: THE INNOVATIVE REFILL SYSTEM

Discover a quick and easy rack refill at an affordable price.

- Use 60% less space on your bench and 70% less plastic.
- Fully autoclavable.
- 100% recyclable.
- One universal reload box for all types of tips.
- Contamination-free refill system.
- Color-coded for easy identification.
- Available sterile.

Place the tower on the reload box and press down firmly with your hand.

The rack snaps into place.

TIPACK™ RACKED TIPS

The new TIPACK design is more compact, convenient, ergonomic and plastic-saving. It offers a ready-to-use solution:

- **Easy-to-use:** stable, more compact with improved use for multichannel pipettes.
- **Eco-friendly:** global reduction of plastic of up to 21% and 100% recyclable.
- **Error-free:** improved traceability and identification.

The patented ROCKY RACK™ system available on TOWERPACK and TIPACK makes it extremely easy to fit tips on a multichannel pipette. Tips will not fall off nor will they have to be manually positioned.

STERILPACK™

For more specific applications, PIPETMAN DIAMOND Tips are also available as individually wrapped blisters.

DIAMOND Pure Performance Tips!

MADE OF 100% PURE VIRGIN POLYPROPYLENE

No dyes. No additives. No trace metals. Smooth hydrophobic surface prevents liquid retention and ensures complete dispensing.

A PERFECT SEAL

Two solid sealing rings when used with PIPETMAN pipettes ensure more consistent and reliable results each and every time.

ERGONOMIC TIP FITTING

Best match between pipette and tips reduces the strain to fit and eject tips.

FULLY TRACEABLE

From the mold to the bench. The Gilson Trident is your guarantee of quality.

GRADUATED VOLUME MARKERS

Volume graduations make it easy to visually check the volume aspirated.

CONTAMINATION PREVENTION WITH PIPETMAN DIAMOND FILTER TIPS

Gilson's high-density polyethylene filter provides an effective barrier against aerosols.

FINE & FLEXIBLE POINT

The last droplet is easier to dispense.

QUALITY TIPS FOR SUPERIOR RESULTS

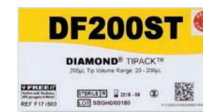

- The only way to guarantee your Gilson pipettes' specifications.
- Full traceability, stringent quality control process and batch to batch reproducibility for complete peace of mind.
- A large choice of packaging to suit all needs and budgets.

*ISO 8655 is an international standard for "piston operated apparatus". ISO 8655 defines, among other things, terms and definitions regarding piston operated pipettes and their testing, testing procedure and maximum permissible errors.
