

360101 Reservoir

Features

1. Made of PP material
2. Low profile design, suitable for small volume robotic tips used in high flux instrument.
3. In the automatic pipetting process, the reservoir can perfectly overcome the surface tension of the liquid and minimize residual liquid
4. Matched reservoir breaker (for 96 and 384) and the cover can avoid the liquid wastage in the process of operation.
5. Can be stored at -80℃
6. Low heavy metal content
7. Used high quality, imported PP material for high stability, ensuring no chemical reactions with test reagents.
8. Compatible with DMSO and inert to water
9. Conformed to ANSI/SBS Standards

Description

Temperature Range :
Shelf Life :
Sterile : No
