B3408 ▶ **Sigma-Aldrich®**

6-Benzylaminopurine

★★★★★ (0)

suitable for plant cell culture

Synonym(s):

6-BAP, BA, N⁶-Benzyladenine

Empirical Formula (Hill Notation):

C₁₂H₁₁N₅

CAS Number: **1214-39-7**

Molecular Weight: 225.25

Beilstein: 19406

EC Number: **214-927-5**

MDL number: **MFCD00005572**

PubChem Substance ID: **24891717**

NACRES: NA.72

DESCRIPTION

General description

6-Benzylaminopurine is a plant growth regulator that belongs to the class of first generation synthetic cytokinin used in agriculture.

Application

6-Benzylaminopurine has been used:

- to induce sprouting in plant materials
- in seed germination medium for culturing of seeds
- to modify Murashige and Skoog (MS) media for shoot initiation

6-Benzylaminopurine, benzyl adenine (BAP) is a synthetic cytokinin which together with auxins elicits plant growth and development responses. BAP is a widely use cytokinin supplement to plant growth media such as Murashige and Skoog medium, Gamborg's medium, and Chu's N6 medium.

Packaging

100, 500 mg in poly bottle

1, 5, 25 g in poly bottle

Biochem/physiol Actions

BAP is an inhibitor of respiratory kinase in plants, and increases post-harvest life of green vegetables.

FREQUENTLY ASKED QUESTIONS

Which document(s) contains shelf-life or expiration date information for a given product?

If available for a given product, the recommended re-test date or the expiration date can be found on the Certificate of Analysis.

How do I get lot-specific information or a Certificate of Analysis?

The lot specific COA document can be found by entering the lot number above under the "Documents" section.

What is the shelf-life of Product B3408, 6-Benzylaminopurine?

This product does not have any official shelf-life or expiration dating associated with it. The only date shown on the certificate of analysis will be the QC Release date. For customers whose systems require formal date management, use of a date one year from shipment is supported by our terms and conditions of supply.

What is Product B3408, 6-Benzylaminopurine, soluble in?

This product is soluble at in glacial acetic acid (50 mg/mL) with the possibility of heating being required. It is also soluble in 1 M NaOH. The product can also be dissolved in 0.1M HCl.

How do I find price and availability?

There are several ways to find pricing and availability for our products. Once you log onto our website, you will find the price and availability displayed on the product detail page. You can contact any of our Customer Sales and Service offices to receive a quote. USA customers: 1-800-325-3010 or view [local office numbers](#).

What is the Department of Transportation shipping information for this product?

Transportation information can be found in Section 14 of the product's (M)SDS. To access the shipping information for this material, use the link on the product detail page for the product.

My question is not addressed here, how can I contact Technical Service for assistance?
