

ImmPRESS® HRP Horse Anti-Goat IgG Polymer Detection Kit, Peroxidase

MP-7405

[Product Images](#)

Short Description

The ImmPRESS polymerized reporter enzyme staining system uses novel conjugation and micropolymer chemistries to create a highly sensitive, ready-to-use, one-step detection system. This unique micropolymer of highly active enzyme is attached to our affinity purified secondary antibodies, producing reagents with outstanding sensitivity and low background.

Features:

- Enhanced staining of nuclear and membrane antigens
- Ready-to-use in a convenient dropper bottle
- Shorter assay time
- Simplified multiple labeling
- Suitable for use with goat, sheep, and bovine IgG primary antibodies

Kit Contents:

- ImmPRESS (Peroxidase) Polymer Anti-Goat IgG Reagent (made in horse, ready-to-use)
- 2.5% Normal Horse Serum for blocking (ready-to-use)

The ImmPRESS (15 ml) Kit will stain approximately 75-150 sections and the ImmPRESS (50 ml) Kit will stain approximately 250-500 sections.

Additional Information

Unit Size	15 ml, 50 ml
Applications	Immunohistochemistry / Immunocytochemistry, In situ hybridization, ELISAs
Technology	Micropolymer Reagents
Detection Enzyme(s)	Peroxidase
Conjugate	Micropolymer HRP
Target Species	Goat
Format	Ready-to-Use

ImmPRESS® HRP Horse Anti-Goat IgG Polymer Detection Kit, Peroxidase

Features:

- High sensitivity
- Low background
- Non-biotin
- Micropolymer technology
- Enhanced staining of nuclear and membrane antigens
- One-step detection
- Ready-to-use in a convenient dropper bottle
- Shorter assay time
- Simplified multiple labeling
- Suitable for use with goat, sheep, and bovine IgG primary antibodies

The ImmPRESS (15 ml) Kit will stain approximately 75-150 sections and the ImmPRESS (50 ml) Kit will stain approximately 250-500 sections.
