Short Description

The VECTASTAIN Elite ABC system is the most sensitive avidin/biotin-based peroxidase system and is approximately 5 times more sensitive than the original VECTASTAIN ABC Kit with the same low background. It is available with a biotinylated anti-goat IgG secondary antibody.

Features:

- Advanced avidin/biotin technology: The Elite_® ABC complex is smaller, very uniform, and highly active, allowing more accessibility for binding to a biotinylated target
- Cost effective: Higher sensitivity leads to lower cost per slide
- Kit contains sufficient reagents to stain approximately 500-1000 sections
