FEATURES

440 g XS - 3XL

- Unisex trousers
- Stretch nylon fabric with a DWR treatment, a textured double weave construction and tear and abrasion resistance
- Knee patches in stretch nylon with tear and abrasion resistance
- Knee patches padded with felt
- Reflective segmented strips
- Stretch waistband with belt loops, button, zip and Velcro fastening
- Hand pockets and side pockets with zip
- Zipped back pocket
- Designed for any emergencies (on the ground or during helicopter rescues)

ACTIVITIES

FABRICS

Primary fabric

TS540
4way stretch Nylon lightweight fabric (145 g/sqm). Good tear and abrasion resistance. The double weave construction with inside in relief keeps the fabric away from the skin, thus enhancing comfort and breathability. PFC FREE DWR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes. The special water-repellent finishing ensures the absence of fluorinated compounds, harmful to the environment. ANTIUV: UPF50+.

Secondary fabric

TS073
4-way stretch fabric (185 g/sqm) with Ripstop construction and water-repellent finish for quick drying and maximum breathability. Extremely comfortable and abrasion resistant, woven for excellent tear resistance. ANTIUV: UPF50+.

CARE INSTRUCTIONS

Wash separately inside out with a small amount of neutral liquid detergent and no fabric softener
Remove promptly after wash
Dry away from sources of light and heat
Do not store the garment when damp
